

**Autosleepers  
Westminster  
£29,995**

The star feature of the Westminster's kitchen is the colossal amount of storage. A suite of drawers and cabinets gives you as much space as you'd find in many a small house kitchen.

Cleverly, the AS designers have made the best use of space by curving and tapering the kitchen slightly, as it goes on down the caravan to meet the wardrobe.

There's enough corridor space – and a huge amount of kitchen surface; it's about 60cm long from the sink to the wardrobe.

Unusually, Autosleepers caravans have extractor fans directly above the hobs, with two good strong spotlights set into them. Lighting elsewhere is a feature of the kitchen, with bright white light streaming across the ceiling from LED strips concealed above the top locker run.

The hob is dual fuel (with a mains hotplate and three gas burners). The microwave, above the kitchen surface, is set at a convenient low level. The fridge is the 175-litre tower style with a separate freezer. It's opposite the kitchen, and has cabinets both above and below.

**LAYOUT...**

*U-shaped central dining area, full-width rear shower room*

**OUR VERDICT**

*We love the amount of lower storage space – and the extractor position, right over the hob where you need it.*
